## ABOUT ME

Passionate about artificial intelligence and machine learning, I specialize in developing innovative AI applications. My approach combines technical curiosity and problem-solving, with a particular focus on LangChain, language models, and conversational systems.

## ACADEMIC BACKGROUND

- **Master's in Artificial Intelligence and Digital Computing (AIDC)** – Faculty of Sciences and Techniques of Beni Mellal (2025)
- **Bachelor's in Information Systems and Digital Transformation (SITD)** – Faculty of Sciences and Techniques of Settlat (2023)
- **DEUST in Industrial Mechanics and Production (MIP)** – Faculty of Sciences and Techniques of Settlat (2022)

## PROFESSIONAL EXPERIENCE

### Artificial Intelligence Developer | DNA Engineering

February 2025 – June 2025

- Developed a multi-agent chatbot to allow recruiters to create job offers via natural language dialogue.
- Created an OCR endpoint (Mistral API) to automatically extract information from CVs uploaded by candidates.
- Implemented intelligent matching between job offers generated through the chatbot (stored in Qdrant) and profiles extracted from CVs.
- Applied semantic filtering to improve recruitment relevance, with strict filtering based on mandatory criteria.
- **Technologies:** Python, Mistral API, Qdrant, Multi-agent, OCR, NLP

### Machine Learning Engineer | Prestigia

March 2023 – June 2023

- Designed a **predictive machine learning model** to estimate the performance of tourist offers published via Trivago.
- The model predicts the **number of clicks and bookings** generated by an offer on a given date of the year.
- The system helped **reduce the cost of marketing tests** by predicting the relevance of offers to be published.
- Measurable improvement in **return on advertising investment** through optimized targeted campaigns.
- **Technologies:** Python, Scikit-learn, NumPy, Pandas, Streamlit, Flask

## TECHNICAL PROJECTS

### SQL Query Assistant – NLP→SQL Conversion:

AI application transforming natural language into optimized SQL queries

**Tech:** Python, Flask, Gemini Pro, LangChain, PostgreSQL

### QuizGenius – RAG Quiz Generator:

Transform PDFs into interactive quizzes via RAG and generative AI

**Tech:** Python, LangChain, LangGraph, FAISS, Gemini Pro

### Newsletter Monitor – AI Aggregator:

Automated generation of personalized newsletters using AI

**Tech:** Python, Flask, Gemini, Tavily API, Heroku

### MCP Server Connector – PostgreSQL + VS Code:

Developed a custom MCP server to connect PostgreSQL to VS Code

**Tech:** Python, PostgreSQL, Fast MCP, Pydantic

## TECHNICAL SKILLS

### Artificial Intelligence & Machine Learning

- TensorFlow, PyTorch, Scikit-learn
- LangChain, LangGraph, RAG
- Transformers, Hugging Face
- FAISS, Qdrant, Vector Search

### Cloud & DevOps

- AWS (EC2, S3, Lambda)
- Docker, Heroku
- RabbitMQ, CI/CD

### Development

- Python, Java (OOP)
- Flask, FastAPI
- MySQL, PostgreSQL, Qdrant
- Git, GitHub, GitLab
- HTML, CSS, Bootstrap

### Data Science

- Pandas, NumPy, Matplotlib
- Seaborn, Streamlit

## LANGUAGES & SOFT SKILLS

### Languages

- French (Fluent)
- Arabic (Native)
- English (Professional)

### Soft Skills

- Technical leadership and mentoring
- Agile project management (Scrum)
